

## Occurrence records for ecological niche modeling:

- GBIF (<https://www.gbif.org/en/>): global database that comprises many of the following

- VertNet (<http://vertnet.org/>): vertebrates (mammals, reptiles, amphibians, birds, fish):

- SCAN (<https://scan-bugs.org/portal/Invertebrates/>): invertebrates (insects, arachnids):

- iNaturalist (<https://www.inaturalist.org/>): literally everything

- HerpMapper (<https://www.herpMapper.org/>): reptiles and amphibians

- NAHerp (<http://www.naherp.com/>): reptiles and amphibians

- Tropicos (<https://www.tropicos.org/Home.aspx>): plants

- eBird (<https://ebird.org/home>): birds

# Ecological Niche Modeling with Maxent:

Maxent Website: [http://biodiversityinformatics.amnh.org/open\\_source/maxent/](http://biodiversityinformatics.amnh.org/open_source/maxent/)

Maxent tutorial: [http://www.amnh.org/content/download/141371/2285439/file/LinC3\\_SpeciesDistModeling\\_Ex.pdf](http://www.amnh.org/content/download/141371/2285439/file/LinC3_SpeciesDistModeling_Ex.pdf)

Maxent Google Groups:

<https://groups.google.com/forum/#!forum/MAXENT>

- browse and post questions about Maxent and associated R packages (ENMeval, dismo, ENMtools)

## R packages for niche modeling:

**ENMeval:** model testing and building ENMs using Maxent

Muscarella R, Galante PJ, Soley-Guardia M, Boria RA, Kass JM, Uriarte M, Anderson RP. ENM eval: An R package for conducting spatially independent evaluations and estimating optimal model complexity for Maxent ecological niche models. *Methods in Ecology and Evolution*. 2014 Nov;5(11):1198-205.

**dismo:** builds ENMs using Maxent, can project on different climate scenarios

Hijmans RJ, Phillips S, Leathwick J, Elith J. dismo: Species distribution modeling. R package version 0.8-17. 2013.

**kuenm:** model testing and building ENMs

Cobos ME, Peterson AT, Barve N, Osorio-Olvera L. kuenm: an R package for detailed development of ecological niche models using Maxent. *PeerJ*. 2019 Feb 6;7:e6281.

**ENMtools:** various niche assessments, including tests of niche similarity among species

Warren DL, Glor RE, Turelli M. ENMTools: a toolbox for comparative studies of environmental niche models. *Ecography*. 2010 Jun;33(3):607-11.

**ecospat**

Di Cola V, Broennimann O, Petitpierre B, Breiner FT, D'amen M, Randin C, Engler R, Pottier J, Pio D, Dubuis A, Pellissier L. ecospat: an R package to support spatial analyses and modeling of species niches and distributions. *Ecography*. 2017 Jun;40(6):774-87.

## Other useful R packages

**spThin:** thins occurrence records

Aiello-Lammens ME, Boria RA, Radosavljevic A, Vilela B, Anderson RP. spThin: an R package for spatial thinning of species occurrence records for use in ecological niche models. *Ecography*. 2015 May;38(5):541-5.

**raster, maptools:** mapping of spatial data

# Environmental Variables for ecological niche modeling:

*General tip:* some environmental variables are easy to download and process (e.g. Worldclim), some are not. Learning how to process complex variables in weird formats (e.g., SSURGO) is a skill on its own. If you want to use these variables, you might want to seek a GIS expert for help.

Below are a few examples, we are also providing a more complete list

**WorldClim** (<https://www.worldclim.org/>): current, past, future climatic variables:

- these are the easiest to download and work smoothly with Maxent

**PRISM** (<http://www.prism.oregonstate.edu/>): current, past, future climatic variables:

- these are also easy to download and should work smoothly with Maxent

## VARIOUS ENVIRONMENTAL VARIABLES

([https://gdg.sc.egov.usda.gov/GDGHome\\_DirectDownload.aspx](https://gdg.sc.egov.usda.gov/GDGHome_DirectDownload.aspx)):

**SSURGO** (<https://nrcs.app.box.com/v/soils>): various soil-related variable

- you need to be pretty skilled with GIS to get and process these layers in a way that will make them useful for ENMs. I suggest you seek a GIS expert to help you.
- various variables in one convenient place via USDA website

**LANDFIRE** (<https://landfire.gov/>)
