

## **Introduction to GIS**

*Computer Science Workshop 2020*

Instructor: Gwendolyn Lloyd (lloydg@miamioh.edu)

TA: Golya Shahrokhi (golya.shahrokhi@ou.edu)

TA: Alfredo Ascanio (ascaniaa@miamioh.edu)

Hi all!!

Thank you for signing up for the workshop, and for this course. I'm so excited to spend time playing with GIS data with all of you.

Before we meet, please be sure to download QGIS (see the *QGIS Download Links* document). If you have access to a licensed version of ArcMap and would like to use that instead of QGIS for this course, email me (lloydg@miamioh.edu) and I will send you a zip file similar to the one you have just received with instructions and ArcMap files.

All the course material is in the folder, and we will be going through it together. If you want to work through it ahead of time you are welcome to and then spend independent work time during the workshop delving further into the data and tools. If you choose to do this, please know that there we will work through the provided content together, so there may be some repetition for you, and you will not be able to work in groups.

I am looking forward to 'meeting' all of you soon!  
Gwendolyn
