How to download and install Wing101:

Note: It is very important to download and install the latest version of Python 3 first.

1. Go to this website to download the latest version of python 3 (which is 3.8.4): https://www.python.org/downloads/

Make sure to download it according to your operating system (OS).

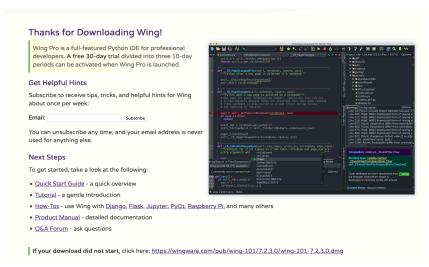

- 2. Install the python
- 3. Go to https://wingware.com/downloads/wing-101

Note: Use this link. There are other version of Wing that are not free.

- 4. Choose an option according to your OS.
- 5. Download the installer. You can subscribe to the mailing list in the thank you page.

- 6. Install Wing101
- 7. Run Wing.
- 8. Make a new file.

File-> New

9. Save the file.

File->Save as...

You can name it however you want but do not delete the .py part of the name.

10. Type this code in python shell box on the bottom right to check.

print ("I'm running Python!")

11. Press enter or click the green play button on the top.
